

# PestPac Mobile 3.x Sketch

The Sketch feature allows you to easily create and view sketches within PestPac Mobile.

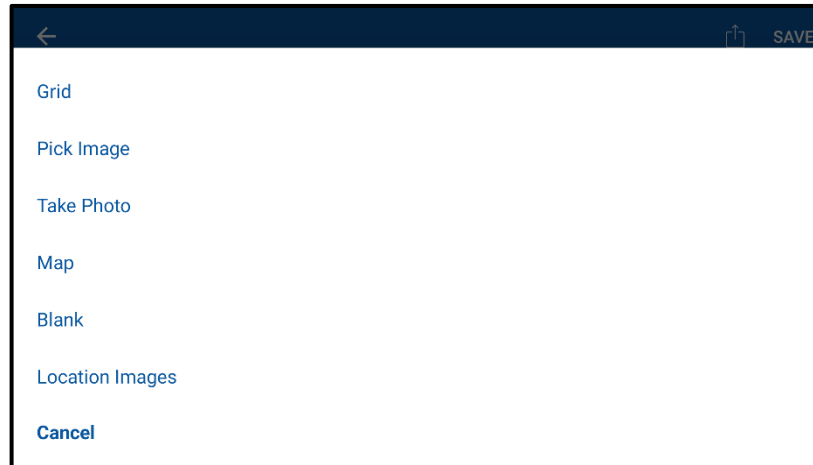

## Create a New Sketch

You can create a new sketch from the *Order* or *Sketches* screen.

1. Click the “+” icon to add a sketch.

2. The following screen appears. Select from the options listed. You can begin drawing a sketch or you can add photos, images, or locations to the drawing area.

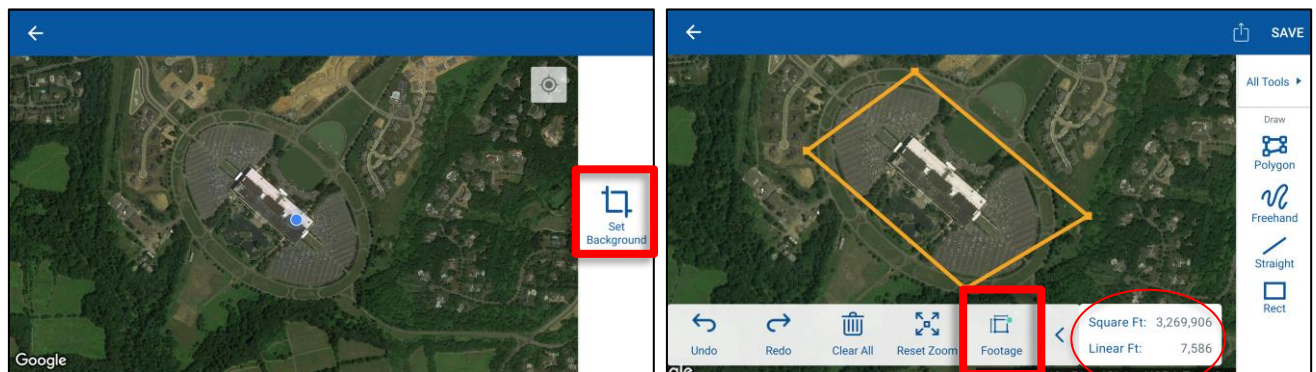

- **Grid** – displays an area for drawing with gridlines that provide visual cues in relation to the objects and the screen.
- **Pick Image** – allows you to select images located on your phone to be used in your sketch.
- **Take Photo** – allows you to take a photo using your phone to be used in your sketch.
- **Map** – allows you to access the satellite view on Google Map and set a desired location to be used in your sketch.
- **Blank** – displays a blank screen for drawing.
- **Location Images** – allows you to select images previously added to a *location* in PestPac to be used in your sketch.

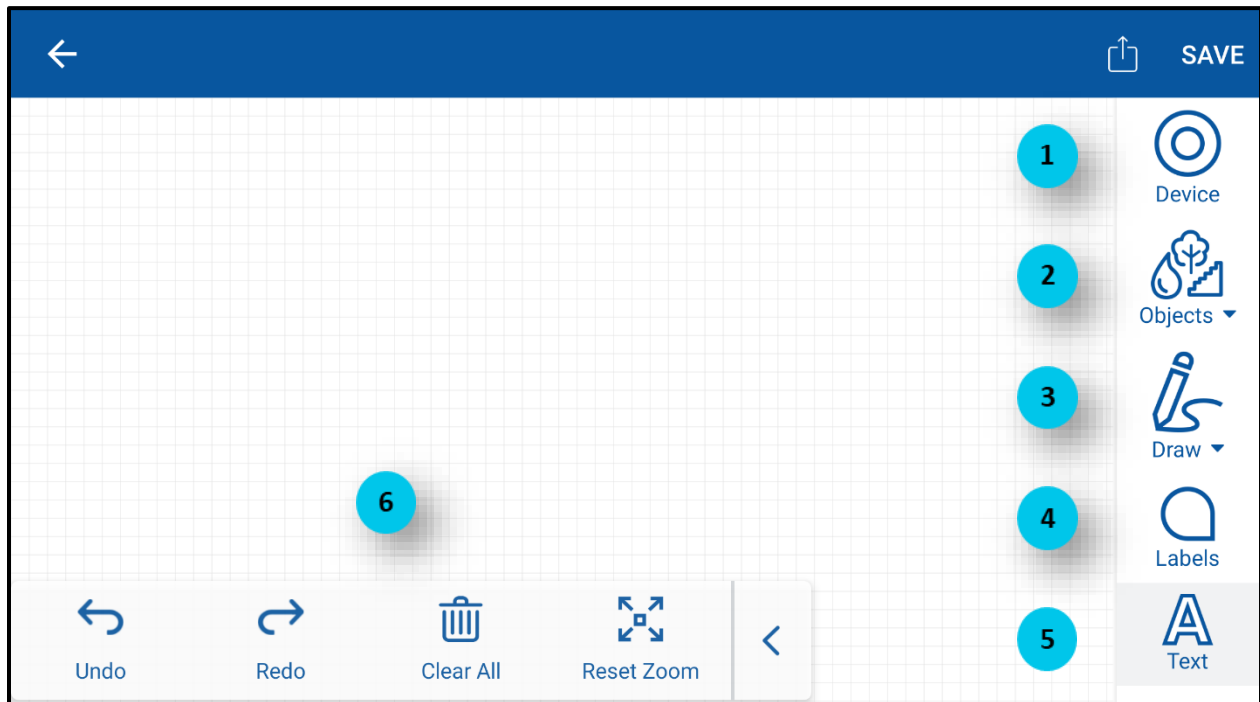

Once Map is selected...

- Click the GPS icon to automatically map to your current location or drag your finger on the map to manually set the location.
- Select *Set Background* to lock the location and display the drawing tools.
- Map sketches have an additional tool that allows both the square footage and linear footage to automatically display if *Footage* is selected.

## Navigating the Sketch Screen

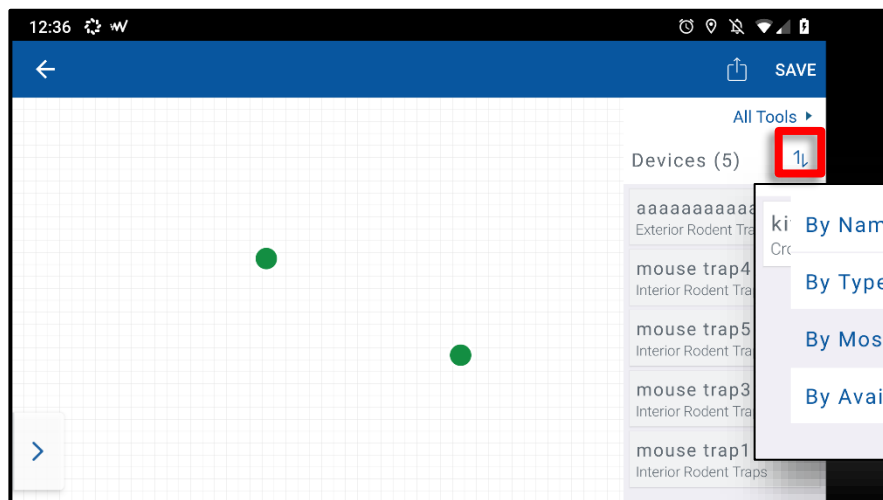

After selecting a *Sketch* option, the *Sketch Screen* appears.

**1 Device** – displays a list of devices that you can add to your sketch.

Select the filter icon to filter the list by name, type, most recent, or availability.

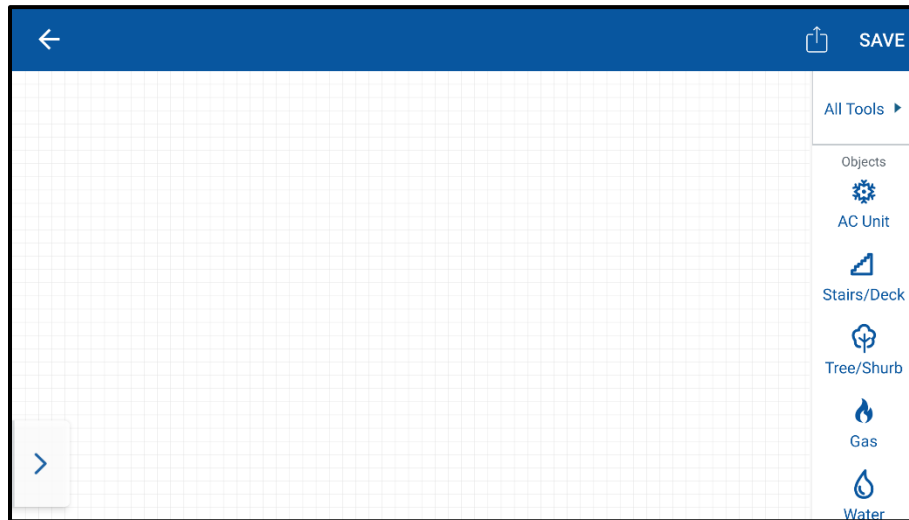

*Note: devices can only be associated with one sketch at a time. If you try to add a device that is attached to another sketch, a warning appears.*

2

**Objects** – displays a list of items that you can drag and drop anywhere in the drawing area.

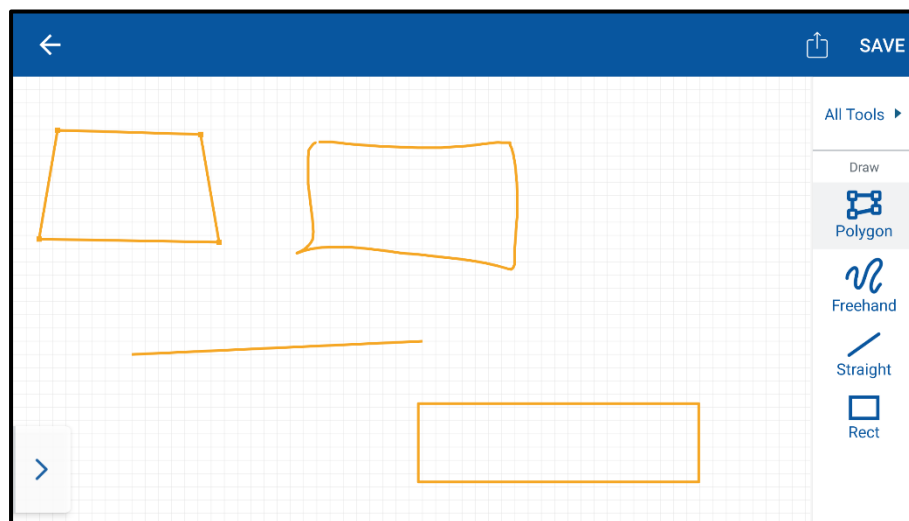

*Press and hold an item in the drawing area to move it to a desired location.*

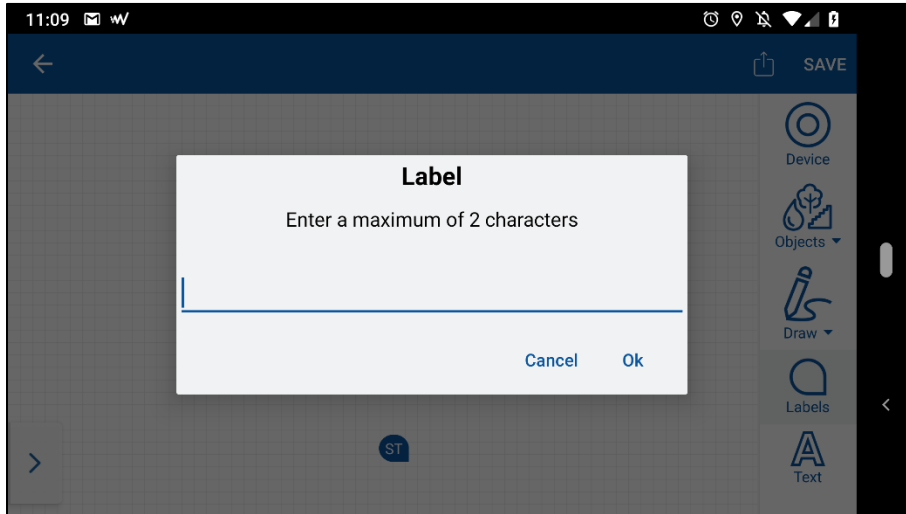

3

**Draw** – displays the drawing tools.

- *Polygon* – add multiple points on the drawing area to create polygonal shapes and paths.
- *Freehand* – drag your finger on the drawing area to create desired shapes.
- *Straight* – create a single straight line
- *Rect* – select a starting point on the drawing area and drag to create a rectangle using your finger.

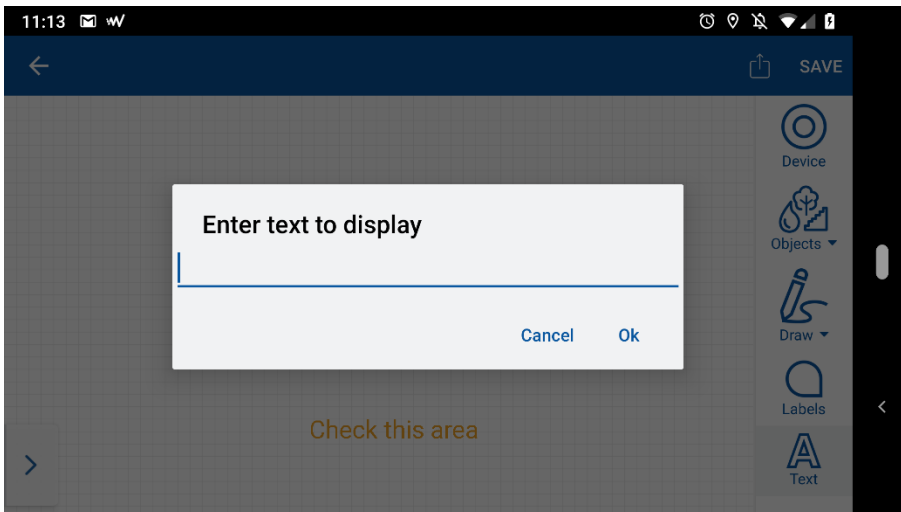

**4** **Labels** – allows you to add labels to your sketch anywhere in the drawing area.

*There is no limit to the number of labels you can add.*

*Press and hold a label in the drawing area to move it to a desired location.*

**5** **Text** – allows you to add text boxes anywhere in the drawing area.

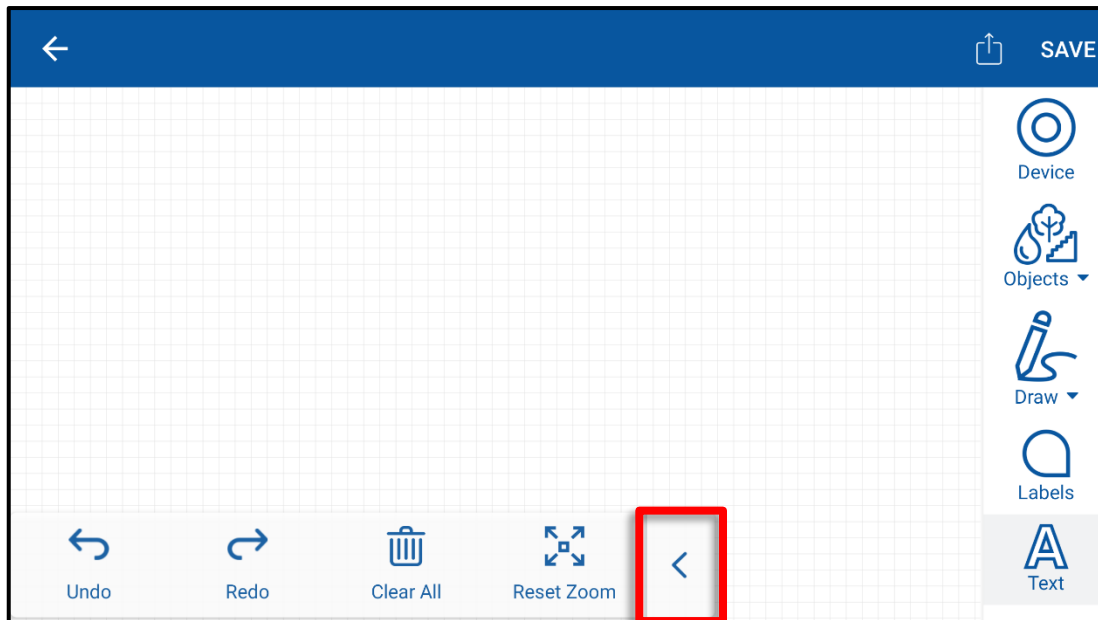

*There is no limit to the number of text boxes you can add.*

*Press and hold a text box in the drawing area to move it to a desired location.*

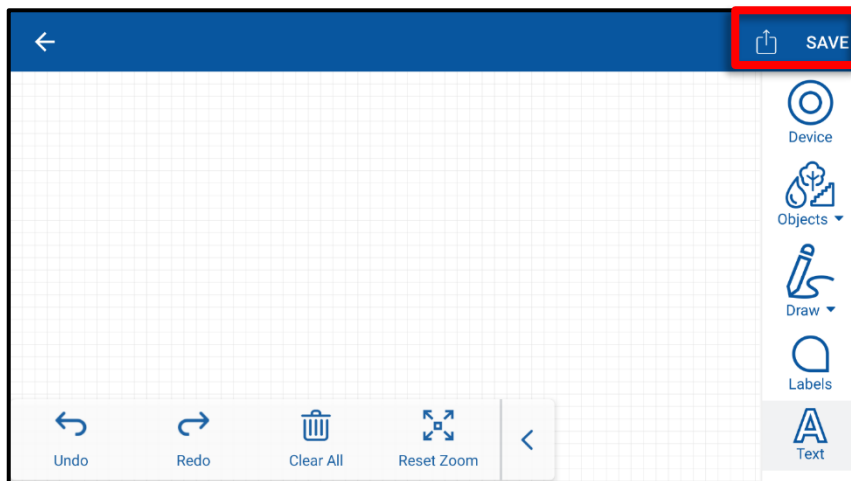

6

**Quick Actions** – show/hide the *Quick Actions* menu bar by clicking the arrow.

- *Undo* – ‘undo’ the last action completed.
- *Redo* – ‘redo’ the last action deleted via *Undo*.
- *Clear All* – removes everything created and/or added to the drawing area.
- *Reset Zoom* – resets the zoom.

### Saving/Sharing

You can save or share your sketch at any time using the *upload* or *Save* icons.
